

Bar Guards & Star Picket Caps

Novaplas manufactures UV Stabilised Bar Guards and safety caps that reduce the chance of cuts and abrasions from exposed reinforcing bars. Suitable for bar from 12mm to 36mm.

Bar guards also fit over star pickets and have a connecting tie which attaches to the post. This tie prevents the cap falling off. Bar guards are not designed for high load vertical impacts.

Product Code	Qty/Bag
BARGUARD	100

Scaffold End Caps

These yellow caps are designed to fit over exposed scaffold tube ends to increase visibility and prevent cement entering the tube.
