

Novabone Heavy Duty Bar Spacer

Novabone bar spacers have been designed specifically for heavy weight and large diameter reinforcing bars used in concrete beams for structures such as bridges.

- Economical alternative to concrete moulded spacers
- Manufactured from high strength engineering polymer
- Coloured to match concrete
- Has similar expansion and contraction rates to concrete
- Moisture resistant
- Central hole for tie wire
- Withstands high ambient temperatures
- Laboratory tested

Tested to AS/NZS 2425:2015
